

MOUNTAIN PINE BEETLE—UPDATE # 10

Guarantees

Unfortunately there are no guarantees.

Alberta's Mountain Pine Beetle Action Plan has drawn heavily on British Columbia's experience over the last ten years. Experience has shown a timely pro-active response to the advancing beetle to be a better alternative than simply hoping that mother-nature will provide a corrective re-balancing on her own.

Our management strategies to deal with the beetle don't come with guarantees but the potential negative consequences of inactivity are too high.

Watch for announcements of an upcoming open house to view operating plans which are being developed to combat the beetles progress.
