

MOUNTAIN PINE BEETLE—UPDATE #8

Logging and Log Haul Safety

Given the high profile nature of our upcoming Mountain Pine Beetle harvest plans, stakeholder communications will also form an integral part of the woodlands safety program.

Spray Lake Sawmills has an extensive woodlands safety program for its harvest operations and an emergency response plan in the unlikely event of an environmental, medical or forest fire emergency.

The log haul also has a log truck monitoring, control and safety program to ensure all log trucks hauling into Spray Lakes' facility are in compliance with regulatory requirements.

These programs are available for public review upon request.
